

Notice of Hydrant Flushing, Street Sweeping and possible discolored water

The Lynnfield Center Water District will conduct water main flushing of the distribution system during the hours of **9AM to 3PM** on **Mondays through Thursdays through the first of June.** This is part of the ongoing regular maintenance of the water distribution system and is in conjunction with the Lynnfield DPW **street sweeping** programs.

Residents may experience **discolored water**, which should clear after running their cold water at the highest faucet within their house for a short period of time. Residents are also advised to **avoid doing laundry** during the flushing period and to **check their water** first by running cold water for a few minutes after each day's flushing period before starting their washing machine. If a customer experiences lower pressure at their faucet after the flushing, they should check the faucet screen for particles which may have collected and clean it out if necessary.

Customers may contact the Lynnfield Center Water District Office at 1.781.334.3901 or the District's web site **www.LCWD.US** for more information.
